

Technical Manager - Mining

About the job:

Patriot Battery Metals (PMET) is a hard-rock lithium exploration company focused on advancing its district-scale Corvette Property located in the Eeyou Istchee James Bay region of Quebec, Canada.

In this role you will be responsible for delivering the Feasibility Study for the Corvette Property as well as providing technical support for the environmental permitting process and ongoing capital works at the site. It is anticipated this role will transition into the Engineering Manager position for the next phase of the project.

Ideally you will have a strong background in engineering management for mining projects with technical expertise in open pit and underground mine development.

Primary Responsibilities:

- Develop and oversee delivery of project scopes, plans and budgets, schedules and deliverables as required for the Feasibility Study.
- Monitor and report study progress and performance to the VP of Project Development and the Technical Steering Group ensuring adherence to budgets and schedules.
- Provide contractual oversight of the agreements for Feasibility Study delivery.
- Oversee and manage the technical risks in the project risk register.

Education and Training:

- Minimum of five years' experience in an engineering management and/or technical management role.
- Minimum of five years total mining experience would be an asset.
- Experience managing engineering consulting services contracts.
- Previous experience working with First Nation communities is an asset.
- Intermediate computer skills (e.g. MS Office including Excel and Word) are essential.
- Valid Class 5 driver's license
- Bilingualism (French and English)
- Must have full working rights in Canada

Working Conditions

- This position will be based in our Montreal office which has a hybrid work model.
- Regular travel to the Corvette Property will be required. Accommodation will be at the Shaakichiuwaan Camp located at KM270 on the Trans-Taiga Road.
